ACTN : Chief, [REDACTED] 25X1A9a
AD/RR

Movement of Copper from Mexico to Italy Aboard SS FRANCESCO MORICINI

1. In compliance with your request of 21 October, there is attached an extract of principal action data, compiled from the Action Monitor Sheet of the Transport Controls Desk in the Economic Defense Division. This case has not yet been brought to a conclusion, insofar as the competence of this office is concerned. It has been pursued on a quasi-experimental basis in order to obtain an accurate judgment of typical communication speeds, possible collaborative action with other agencies, and opportunities for making the most of the coordinating function of CIA.

2. Several important commitments were made in the work on this case which are not related in the attached listing. Anyone using this material for further work prior to our closure of the case should be fully briefed on these matters. The personnel of the Transport Controls Desk is ready to assist with oral comment or by showing all of the materials currently filed in the case folder.

B/

Robert Amory, Jr.
